

AIC - Honolulu, July 10

Development of a harmonized protocol for hippocampal tracing

An EADC-ADNI joint effort

**M Boccardi, R Ganzola, N Robitaille, S Duchesne,
A Redolfi, M Bocchetta, G Bartzokis, R Camicioli,
JG Csernansky, MJ de Leon, L deToledo-Morrell,
RJ Killiany, S Lehericy, J Pantel, JC Pruessner, H
Soininen, C Watson, C Jack, GB Frisoni**

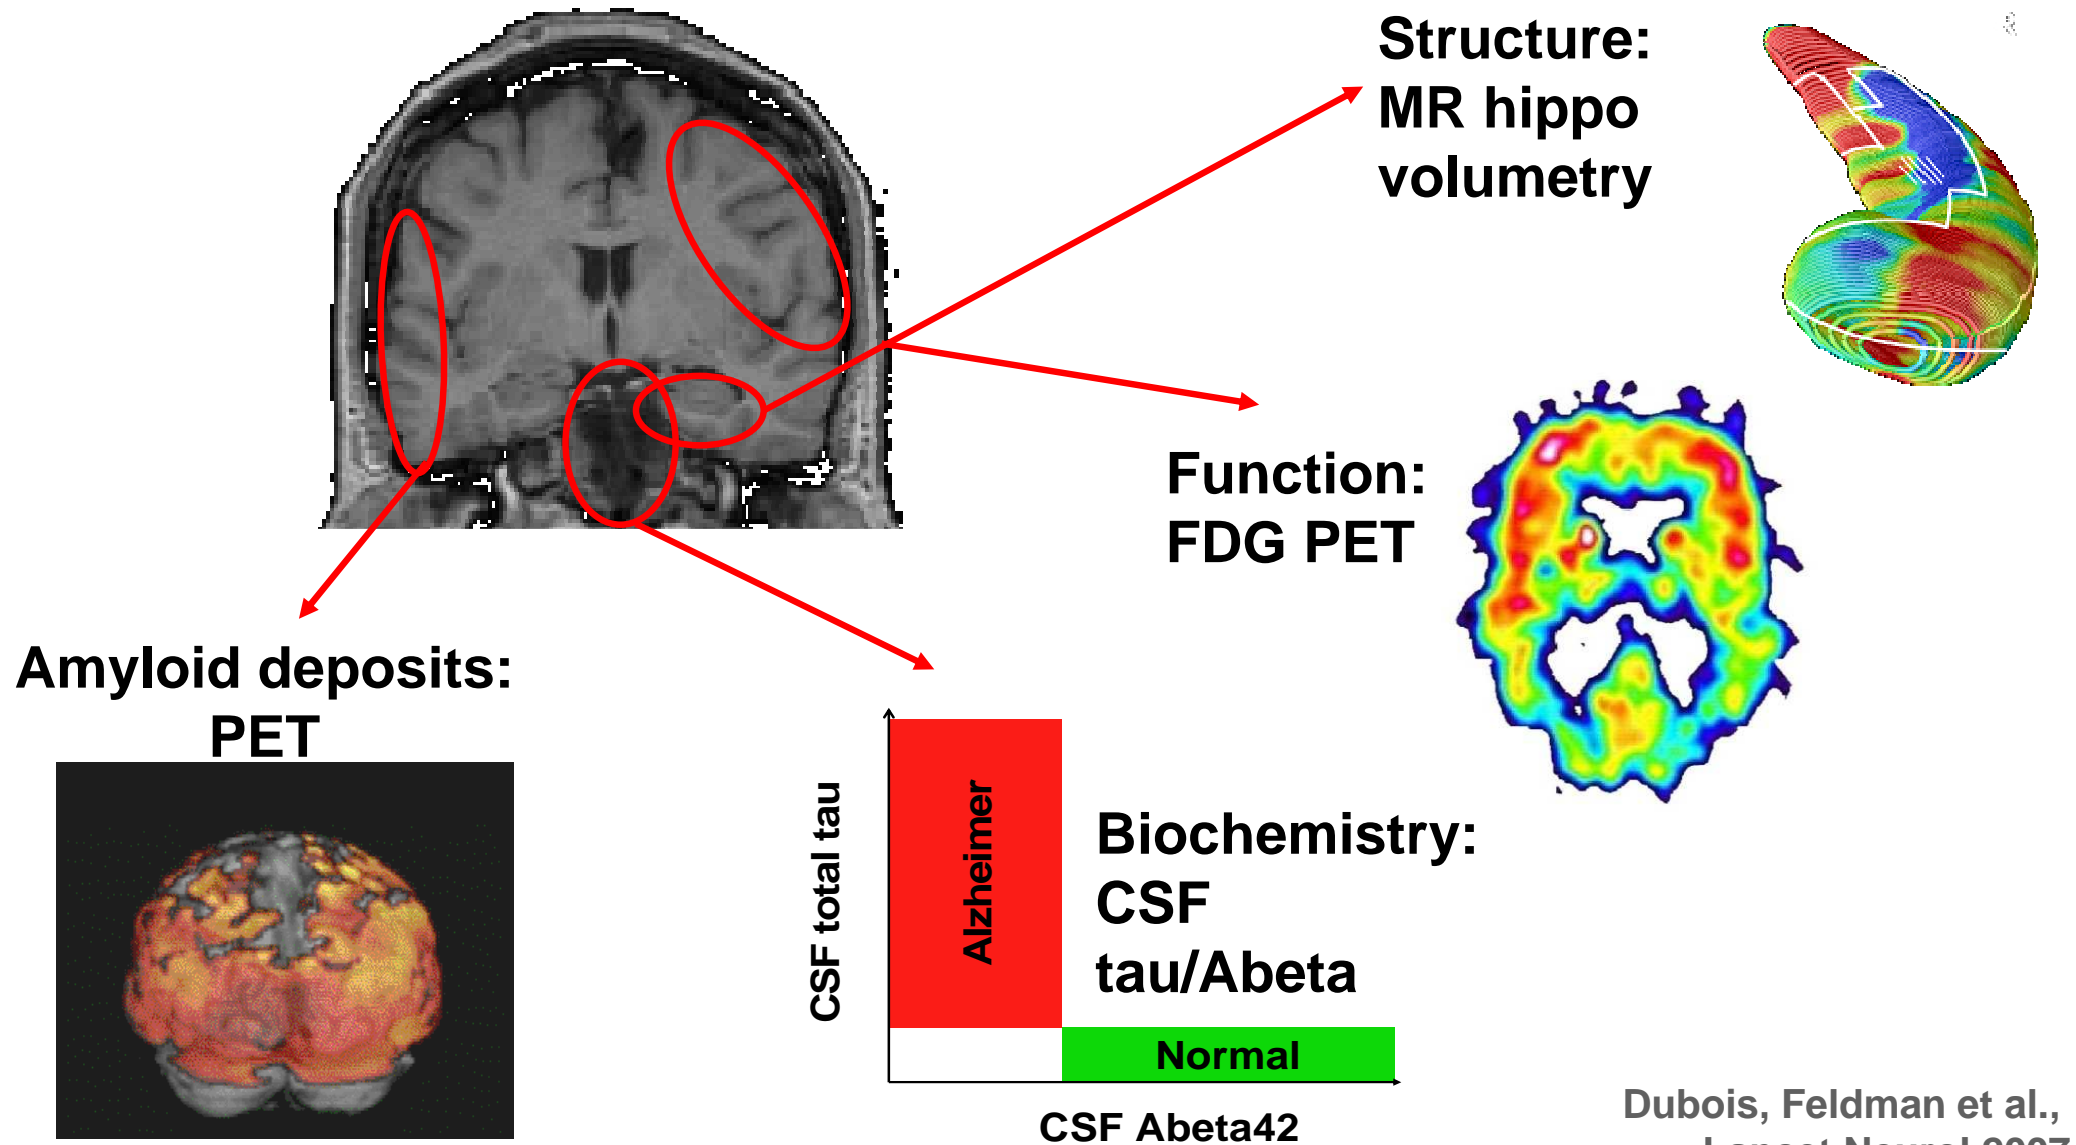

DISCLOSURES

Funded in part thanks to an unrestricted grant by
Lilly and Wyeth

Bartzokis Research support – Janssen; Consultant - Lilly, Pfizer, Novartis; **Csernansky** Consultant Eli Lilly; **Duchesne** Research support - Agfa HealthCare Inc.; funding as a partner in the project; **Jack** Contract – Pfizer; consulting – Élan; **Lehericy** Consultant - EISAI, Janssen-Cilag

BACKGROUND

Hippocampal volume as a diagnostic marker

BACKGROUND

Hippocampal volume as an outcome measure in trials of disease modifiers

Drug	Study	Effect	Segment. method	Ref
Tramiprosate	Alphase	68% (100 mg) 120% (150 mg)	Not mentioned	Gauthier et al., JNHA 2009
Atorvastatin	ADCLT	“CHV* mm ³ -134±174 vs - 583±354 <i>p</i> > .05”	Manual protocol Insausti et al., 1998 AJNR; Machulda et al., 2001, Neuroimage	Sparks et .a,l CCJM,2008
	LEADe	“significant at <i>p</i> < .05”	MIDAS (semiautomated)	Jones et al., Alz&Dem 2008 Feldman et al., Neurology 2010
AN1792		“CHV* % 3.78±2.63 vs 2.86±3.19 <i>p</i> = 0.124”	Manual protocol Watson et al., 1992, Neurology	Fox N et al., Neurology, 2005
Xaliproden	Sanofi- Aventis Trials	“significant atrophy” §	Not mentioned	From Vellas B et al. (Review), Lancet Neurol.,2008
Donepezil		“CHV* % -6.14±3.49vs - 4.50±2.28 <i>p</i> = 0.07” ε4 carriers only	Manual protocol Jack et al., 1989;Radiology Jack et al., 2004; Neurology	Jack CR et al., Neurobiol. Aging, 2008

* CHV= Change in hippocampal volume; § referenced link not working

BACKGROUND

The effect of segmentation protocols on hippocampal volume

Ref.	Med border	Lat border	Inf border	Norm. hippo vol (cm ³)	
				Left	Right
Watson et al.	Mesial edge of temporal lobe	Temp horn of lat ventr	Incl subicular complex & uncal cleft w/ border separating subicular complex from parahippo gyrus	4.903	5.264
Zipursky et al.	Regional outline at choroidal fissure	Not mentioned	The interface of hippocampal tissue and parahippocampal gyrus white matter	1.990	2.070

BACKGROUND

Hippocampal volume (manual segmentation) as gold standard for automated segmentation algorithms

AIMS

IMMEDIATE: To operationalize protocols differences in order to quantify their impact on:

test-retest variability

total hip volume

differences between AD and controls

FINAL: To feed quantitative info to a panel of experts to achieve a consensus for a harmonized protocol with a Delphi procedure

OPERATIONALIZATION

Selection of segmentation protocols

From the pool of (original) protocols identified by Geuze 2005 (n=14) and by Konrad 2009 (n=42), we selected 10 protocols based on:

- i) 3D T1 MRI with field strength greater than 1 Tesla
 - ii) only and the whole (most) hippocampus
 - iii) reliability measures on at least 10 subjects
 - iv) slice thickness lower than 3 mm
 - v) validated on AD/MCI samples, or most used in the AD literature
- + 2 further (particularly detailed) protocols

OPERATIONALIZATION

Authors' check

For each protocol:
features extraction, tracing and author's certification

Areas explicitly included		Areas explicitly excluded	Most anterior slice	Most posterior slice
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fasciolar gyrus (FG)		Andreas-Retzius gyrus (ARG), the part of the FG that is adjacent to ARG, crus of fornix	slice where one of the following is visible: alveus, temporal horn of lateral ventricle (uncal recess) or amygdala	slice where an ovoid mass of gray matter started to appear inferomedially to the trigone lateral ventricle
BOUNDARIES				
	Lateral border	Inferior border	Medial border	Superior border
HEAD	temporal horn of lateral ventricle (uncal recess)	uncal cleft (if visible)	CSF of ambient cistern	temporal horn of lateral ventricle (uncal recess) and alveus
BODY	temporal horn of lateral ventricle (uncal recess)	White matter of the parahippocampal gyrus	CSF of ambient cistern	superior exquadrigen
TAIL	Discrimination of HI from FG and crus of fornix using arbitrary borders	adjacent white matter	atrium of lateral ventricle	Discrimination of HI from FG and crus of fornix using arbitrary borders

Meeting Archive:
Csernansky's protocol for harmonized hippocampal volumetry

Meeting Description:
Harmonization of Protocols for the Manual Tracing of the Hippocampus - An EADC_ADNI Joint Effort

Date & Time

Host(s): ALBERTO REDOLFI

Scheduled Date: Wed, Sep 16, 2009

Scheduled Time: 10:00 AM CDT

Powered by Ready-Access®

OPERATIONALIZATION

Extraction of similarities and differences

Harmonized language

Reduction of redundancy

Extraction of (harmonized) differences

Definition of segmentation units and subunits

Area	Area explicitly included	Area explicitly excluded	Most anterior slice	Most posterior slice
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible

Area	Area explicitly included	Area explicitly excluded	Most anterior slice	Most posterior slice
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible
CA regions, dentate gyrus, subiculum, alveus, fimbria, part of the fascicular gyrus (FG)	Address: fascicular gyrus (FG), part of the fascicular gyrus (FG) adjacent to CA of form	Address: fimbria, part of the fascicular gyrus (FG)	slice where one of the subunits is visible	slice where an oval mass of CA is visible

Plane of tracing				
Axis of hippocampus [B,C,J,L,S]		AC-PC line [H,K,M,Pa,Pr]		
Most posterior slice				
Where inferior and superior colliculi are jointly visualized [B]	Where crus of fornix is visible in full profile [C,K,L]	Where the crura of the fornices are seen in full profile on both sides [I,S]	Where gray matter is visible inferomedially to the trigone of the lateral ventricle [H,M,Pa,Pr]	
Superior border				
Lower border of alveus/fimbria [B,H,K,Pa,S]	Upper border of alveus/fimbria [C,J,L,M,Pr]	Horizontal line from the superior border of the quadrigeminal cistern to the lateral ventricle (tail) [Pr]		
Separation subiculum/entorhinal cortex				
vertical line from the CA to the WM of the parahippocampal gyrus [C]	45° line connecting the most inferior part of the subiculum medially to the cistern (head and body) [Pr]	Oblique line with same inclination of parahippocampal WM, connecting the inferior part of the subiculum to the quadrigeminal cistern [K,L,MW]	Horizontal line from the highest medial point of the parahippocampal WM to the cistern [B,H,JW]	Line outlining the contour of white matter of parahippocampal gyrus [Pa,S]

Protocols (first author)	Citations	Cit. AD & hippo* literature	Inclusion	Justification of exclusion/inclusion

Most caudal	321 (77)	12 (2)	172 (104)	10 (6)	-46%	0.009	0.935
MaxHV	2739 (334)	100	1836 (613)	100	-33%	0.001	

DISCUSSION

The operationalization of the protocols differences gave 4 segmentation units + subunits

Heterogeneous contribution of units to total hippo volume and to differences between patients and controls

Lowest reliability for alveus/fimbria and most caudal slices
